Crescent Hotel San Francisco Completes Renovation

Jul 13, 2010

Crescent Hotel San Francisco has completed its renovation, which also includes the debut of the hip, relaxing Burritt Room lounge. When possible, the architectural team preserved the façade and molding, wainscoting, vintage tiles, exposed original brick, and hardwood floors of the original 1910 building. The interiors showcase a black, white, and red color scheme accented by chandeliers and antique mirrors for a touch of old world grandeur. The hotel also offers meeting space, a lobby lounge with music library, and event space off the Burritt Room.
